### *~ Public Participation ~*

Rocky Hill holds public council meetings on the 1st and 3rd Monday of the month at 7:30 P.M. Meeting information may be obtained by calling 609-924-7445.

### *~ Sources of Supply ~*

## *Rocky Hill Water Department*

**PWS ID# 1817001**  
**Facility ID# TP001001**

Rocky Hill obtains its water from Well #2, located on Young Drive. This well is drilled into the Brunswick Formation.

### *~ Sources of Contaminants ~*

## *Health Information*

The sources of both tap and bottled water include rivers, lakes, streams, ponds, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (1-800-426-4791).

Rocky Hill's water meets all USEPA and NJDEP drinking water health standards.

## *Vulnerable Populations Statement:*

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the EPA's Safe Drinking Water Hotline (1-800-426-4791).
